2014 Alternative Clean Transportation Expo **Returns to Southern California May 5 – 8**

*North America's largest clean fleet show to co-locate with
the 14th biennial NGV Global Conference and Exhibition*

SANTA MONICA, Calif.—Nov. 7, 2013—After setting record attendance this year in Washington, D.C., [Gladstein, Neandross and Associates](#) (GNA) has announced that the annual [Alternative Clean Transportation \(ACT\) Expo](#), North America's largest alternative fuel and clean vehicle technologies event, will return to Long Beach, Calif. for the 2014 conference. Taking place May 5–8 at the Long Beach Convention Center, ACT Expo will co-locate with the 14th biennial [NGV Global Conference and Exposition](#), which has played a significant role in developing the global natural gas for transportation market.

“With Southern California serving as the epicenter of alternative fuel market development for the past 20 years, Long Beach was a natural choice for the co-location of ACT Expo 2014 and NGV Global 2014,” stated Erik Neandross, Chief Executive Officer of GNA. “Merging North America's largest clean fleet expo with the world's leading natural gas vehicle conference will result in the largest gathering of clean transportation stakeholders that North America has ever seen. We are excited to engage with a robust community of national and global fleet stakeholders to bring the latest advances in clean transportation to the forefront of the industry.”

ACT Expo 2014 will gather thousands of alternative fuel industry leaders from across North America to showcase advanced technologies for all weight classes and alternative fuels—including electric, hybrid, hydrogen, natural gas, propane autogas, and renewable fuels. The week-long program will feature fleet-focused educational sessions, off-site tours, advanced technology training, an AFV ride-and-drive, and a 150,000 sq. ft. Expo Hall featuring a dedicated global natural gas zone.

ACT Expo conferences are widely recognized for providing strong educational value and positive results for transportation professionals that are responsible for procuring and maintaining their private and public fleet operations. Specialized breakout sessions allow conference attendees to learn about the latest on-road transportation innovations and product offerings, explore project development strategies and partners, and interact with panelists to gain firsthand insights on clean vehicle technologies.

Early bird registration is now open for the industry's premier clean fleet event. For more information on the 2014 ACT Expo and the co-location of NGV Global 2014 including registration rates

and programming details, visit www.actexpo.com and www.ngv2014.com Follow the latest clean fleet-fueled updates on Twitter [@ACTExpo](https://twitter.com/ACTExpo) and [@NGVGlobal](https://twitter.com/NGVGlobal).

About Gladstein, Neandross & Associates (GNA)

GNA is a leading North American consulting firm specializing in market development for low emission and alternative fuel vehicle technologies, infrastructure and fuels for both on and off-road applications. GNA provides strategic market analysis and planning, technical assistance, and public affairs and policy support to clients in the private, public and non-profit sectors. For 20 years, GNA has pioneered the nation's largest and most innovative alternative fuel vehicle projects, including the development of several successful clean fuel corridor projects across the U.S. GNA hosts two of North America's leading alternative fuel and advanced vehicle technology conferences—the Alternative Clean Transportation (ACT) Expo and the High Horsepower (HHP) Summit. GNA is headquartered in Santa Monica, California, and New York City. For more information, visit www.gladstein.org.
