2015 Alternative Clean Transportation (ACT) Expo
Agenda Announced as Early Bird Registration Opens

Thousands of clean transportation stakeholders are expected to participate in the world's largest clean fleet event. The program will include four-days of educational sessions, an expansive exhibit hall, networking opportunities, and multiple co-located industry events.

SANTA MONICA, Calif.—Nov. 19, 2014— [Gladstein, Neandross and Associates](#) (GNA), organizers of the [2015 Alternative Clean Transportation \(ACT\) Expo](#), today released the agenda and opened early bird registration for the fifth annual event taking place May 4–7 at the Kay Bailey Hutchison Convention Center in Dallas, Texas. ACT Expo has partnered with multiple leading industry associations to develop the four-day program—including the Propane Education and Research Council (PERC), the Electric Drive Transportation Association (EDTA), the North American Council on Trucking Efficiency (NACFE), NGV Global, BSR Future of Fuels, among many others.

“From a variety of alternative fuels, all kinds of vehicle information technology systems and a huge array of efficiency improvement technologies, the level of technological innovation and adoption taking place right now in the fleet industry is absolutely unprecedented,” said Erik Neandross, CEO at GNA. “In teaming up with leading alternative fuel industry associations, ACT Expo will provide fleet managers with a one-stop shop to learn about the full spectrum of available AFV options—including hybrid, hydrogen, natural gas, propane autogas, renewables and efficiency technologies—so they can develop their own customizable clean fleet plan.”

To help ensure that the programming is as relevant and impactful as possible for ACT Expo's 700+ fleet attendees, the ACT Expo team has assembled a High-Volume Fleet Planning Committee with representation from Walmart, Anheuser-Busch, Dallas Area Rapid Transit, Coca Cola, Enterprise Fleet Management, United Parcel Service (UPS), Penske Truck Leasing, Ryder System, City of Santa Monica, Iowa Department of Transportation, Pacific Gas & Electric Company, The Parking Spot, along with several other leading public and private fleet operators. The four-day program will feature fleet-focused educational sessions, off-site AFV technical tours, co-located industry workshops, hosted networking events, and the industry's largest expo hall.

Early bird registration offers attendees a huge savings opportunity with fleet registration at just \$295 and general registration at \$650. For more information on the 2015 ACT Expo, visit www.actexpo.com.

About Gladstein, Neandross & Associates (GNA)

GNA is the leading North American consulting firm specializing in market development for low-emission and alternative fuel vehicle technologies, infrastructure and fuels for both on and off-road applications. For more than 20 years, GNA has pioneered the nation's largest and most innovative alternative fuel vehicle projects, including the development of several successful clean fuel corridor projects. In addition to its technical consulting practice, GNA hosts two of North America's leading alternative fuel and advanced vehicle technology conferences—the Alternative Clean Transportation (ACT) Expo and the High Horsepower (HHP) Summit. www.gladstein.org
