#### **The California Hydrogen Business Council Joins**

#### **ACT Expo as a Co-Host to Advance Hydrogen Transportation Technologies**

*CHBC and ACT Expo partnership will bring together industry, government, and academia to advance the future of hydrogen technologies in the North America*

**SANTA MONICA, Calif.—January 29, 2015**—The [Advanced Clean Transportation \(ACT\) Expo](#), North America's largest clean vehicle event, and the California Hydrogen Business Council (CHBC), the industry association dedicated to advancing the commercialization of hydrogen in transportation and stationary sources to reduce emissions, have renewed their strategic partnership to showcase the growing array of hydrogen and fuel cell transportation technologies and provide a hands-on education on how these technologies can help address transportation-related emissions.

"Working with CHBC, the 2016 event in Long Beach will undoubtedly have a bigger and better showcase of hydrogen and fuel cell technologies, complementing the existing lineup of AFV technologies," stated Erik Neandross, CEO of GNA, the producers of ACT Expo. "We are excited to embark on this partnership with CHBC to help accelerate the pace of adoption and deployment of hydrogen technologies in North American fleet operations."

In addition to co-hosting ACT Expo, CHBC is also co-locating their annual Spring Summit during the 4-day event, which will provide a balanced forum for businesses, academia, and government agencies to explore hydrogen and fuel cells through intelligent conversation, thought-provoking presentations and sessions. Attendees will have the chance to hear from an impressive array of senior government officials and industry executives providing their vision of the role of hydrogen and fuel cells across North America and laying out their plans for continued technology commercialization.

ACT Expo 2016 – set for May 2-5 in Long Beach, California – will assemble more than 3,000 attendees and 250 sponsors and exhibitors to examine the latest alternative fuel and advanced vehicle technologies for all weight classes, including electric drive, hybrid, hydrogen, natural gas, propane autogas, renewables, and efficiency technologies. The comprehensive clean vehicle event will also feature an off-site hydrogen tour and a wide range of hydrogen and fuel cell technologies on the expo hall show floor.

### About the Advanced Clean Transportation (ACT) Expo

ACT Expo is North America's largest clean vehicle event, representing all weight classes and alternative fuels—including electric, hybrid, hydrogen, natural gas, propane autogas, renewable fuels, and advanced technologies. The annual event is produced by Gladstein, Neandross & Associates (GNA), the leading North American consulting firm specializing in market development for low-emission and alternative fuel vehicle technologies, infrastructure and fuels for both on and off-road applications. ### About The California Hydrogen Business Council (CHBC)

The California Hydrogen Business Council is comprised of organizations and individuals involved in the business of hydrogen. Its mission is to advance the commercialization of hydrogen in transportation and stationary sources to reduce emissions and dependence on foreign oil.
